

# Curiosity

**Student:** Megan Darvis

**District:** Cheney Public Schools

**School:** Cheney High School

**Instructor:** Jessa Morissey

## **Curiosity**

**Medium:** Digital photography

## **Artist Statement:**

When taking photos I usually ask myself different questions. Like do the colors blend in to the background if so how do I make the object or person pop or what kind of lighting do I want in this photo. I use many different angles and techniques to capture photos that are all different in their own way.

## **Description:**

My thought taking this photo was trying to get my cats green eyes to pop. The lighting was beautiful on his fur and the way he just looked at the camera. Making sure he stayed focused on the camera was tricky, because I could lose his attention at any moment. My camera flashes kept him interested long enough for me to capture this photo.

**Status:** Sell
