## Nature Fantasy

**Medium:** Graphic Art

### Artist Statement

This piece was inspired by other landscapes I've seen in photography, paintings, and graphic artworks. I wanted to focus on the organic shapes and irregular patterns found in nature. This place symbolizes tranquility and growth for me. I've visited the Hoh Rainforest several times and it holds a special significance for me. Being surrounded by nature allows oneself to have a break from society.

### Description

The central emphasis is a sequence of cascading waterfalls in light values. This is surrounded by green foliage of ferns, trees, shrubs, and moss. I tried to experiment with textures and depth with the layering of objects which I drew in Adobe Illustrator.
