#### Artist Statement

Wearing a mask at school is hard. Being in a Pandemic and navigating all the opinions and chaos is hard. The hard isn't the only thing to focus on though. There is still light shining around us to push us into our best selves even in these challenging times. There is still light that surrounds us and gives us hope. I wanted to draw the eye to the light engulfing the subject and giving a sense of hope even though our situations are not all ideal.
